Wheel Dumpers

Unbeatable off-road: the DW90 wheel dumper

Uneven ground conditions are the area of application where the wheel dumper is most at home. This is where its strengths are displayed to best advantage: hydrostatic all-wheel drive with ECO mode, exceptional off-road capability and extreme gradeability, paired with different skip versions and a wear-free spring-loaded parking brake.

- Maintenance-free hydrostatic all-wheel drive.
- Very good gradeability
- Swivel tip skip optional ex factory
- Maximum payload 9,000 kg
- For maximum comfort. Optionally with air-conditioning system

Hydrostatic all-wheel drive

- total focus on the job, no busy shifting of gears
- one central hydraulic engine drives both axles via a cardan shaft
- hydrostatic braking effect as soon as the foot is taken off the accelerator pedal
- low-wear drive for reduced service and maintenance costs
- controlled delay for regulated switching, thus no abrupt change of drive
- accelerate from 0 to maximum speed of 28km/h without traction loss
